E. H. MACK, Claresholm.**Claresholm Local News**

Ruth Dalman was a patient in the local hospital this week.

Mrs. Margaret Willis of Stavely is a patient in the local hospital.

Mrs. R. Jacobson is a patient in the local hospital since Thursday.

Mrs. Dawson and daughter Helen spent two days visiting in Lettbridge this week.

Mr. and Mrs. G. M. Godley entertained friends Monday night with bridge and dancing.

M. R. Buchler, of Parkland, is a patient in the local hospital, being admitted on Thursday.

Mr. and Mrs. Tim Chilton are leaving on Saturday for Frazee, Minnesota, for a visit with Mrs. Chilton's mother.

Hilney Peterson, 11 year old daughter of J. Peterson of Gratum, was a patient in the local hospital this week.

The schedule for the continuation of the games in the Foothills Hockey League is to be arranged at a meeting of the league executive tonight.

With this issue The Review starts on the 24th year of its existence, going on ten years of which have been under the ownership of the present Editor.

Renee Adoree and supporting cast in James Oliver Curwood's "Back to God's Country," at the local theatre Friday and Saturday nights this week. Good pictures next Monday and Tuesday nights, also.

Claresholm schools re-opened on Tuesday after the holidays which were somewhat shortened this time on account of so much ice falling, lost winter schools were closed as a precautionary measure against infantile paralysis.

Born, at the local hospital, on January 6th, 1928, to Mr. and Mrs. Ernie M. Bush, a daughter. Being the first baby in this district in 1928, Baby Bush thus wins the handsomely decorated christening cake given by the Claresholm Bakery.

Misses Frances and Marion McKinney, Helen Brown and Clara Edlund their friends at a dance in the I. O. O. F. hall last Friday night. About a hundred young people were present and all spent a good time. Noxy dances added to the enjoyment.

Miss Florence Pfefferle left on Monday morning for Seattle where she will resume her studies at the University of Washington. She was accompanied by her mother, who will spend several weeks at the coast cities before returning home.—Calgary Albertan.

At Elk's lodge on Wednesday night, H. A. Fairbairn was presented by the lodge with a Past Exalted Ruler's jewel and collar. W. J. Welker was presented with a fine gold ring with emerald Elk setting, as a token of the lodge's appreciation of his services in managing the summer carnival. Neat speeches expressing the lodge's appreciation of services rendered accompanied both presentations.

Last Saturday was one of the coldest days of the winter, the thermometer marking 33 below zero in the morning and 22 below being the warmest of the day at 2 p.m., with a cutting wind. Sunday was also cold, ranging from 25 below to 14 below. Monday was still sub-zero though moderating during the night, and by noon Tuesday a chinook was blowing and the snow was melting. The mild weather has continued since then, the mercury going up as high as 50 above on Wednesday. The snow has disappeared rapidly, many fields being almost clear of snow, and farmers are beginning to entertain hopes of getting their grain threshed.

**CAPTAIN DANCEY  
TO LECTURE HERE**

Captain S. N. Dancey will carry through his program for the promotion of Canadianism, under the auspices of Claresholm Elks Lodge, on Friday, January 27th. His program includes addresses to the schools, agricultural college, board of trade, women's institute etc., during the day, and in the evening a big community gathering when in addition to Captain Dancey's address there will be a good musical program.

Captain Dancey is one of the best known and most popular speakers on the public platform. It will be remembered that he was one of the lecturers on the Chautauqua course a few years ago.

Wednesday night Captain Dancey will be in Claresholm making arrangements with the Elks for his appearance here on the 27th.

**TOWN COUNCIL MEETING**

Town council met in regular session Thursday evening. Present, Mayor Ringrose, Councillors Arnestad, Godley and Reinecke. Accounts were presented by Drs. McMillan and Carroll, and the hospital, in connection with an operation on Leonard Smith. The council from information obtained found that the town was not liable as Smith did not qualify as a resident.

In matter with accounts in connection with operation on Louis Wortendyke, the matter was filed for investigation.

The secretary was authorized to sign contract with Canadian General Electric Co. for lamps to be supplied at list price less 23 and 5 per cent discount.

T. A. Murray was appointed returning officer for the councilors and school trustees election to be held in February.

E. B. Nowers of Calgary was appointed assessor for the town and school district for 1928.

Accounts were passed and payment ordered to the amount of \$10,374.31.

**GRANUM WINS  
FROM CLARESHOLM**

Monday a big crowd filled the rink to see the league hockey game here between Claresholm and Gratum. The visiting team brought a crowd of lusty rooters with them. The game was an exhibition of clean, fast hockey. Gratum continued their winning record, the score being 6 to 3 in their favor. Claresholm scored the first goal. The first period was fast and brilliant, closing with both teams on even terms 1-1.

Claresholm secured the first goal in the second period, but after that the better condition of the visitors was evident and the period ended 4 to 2 in their favor.

In the final period Gratum added two more goals and Claresholm one, the total score being 6 to 3.

Gratum Lineup—Carmichael, Boyle, Wray, Tretlow, Murray, Bayly, Moore and Cole.

Claresholm—Paulson, McDonald, Hobbick, Hare, Pettley, Bartsch, Palmer, Powers, and Amundsen.

The Foothills Curling Association's annual bonspiel will open in Claresholm's new rink next Monday, weather permitting. The devotees of the "roarin' game" are praying for cold weather. The skating rink is being laid off for curling and will provide seven extra sheets of ice. All towns in the association have signified their intention of being represented. Very fine trophies are up for competition. These are now on exhibition in Clark Bros' show windows and make a great display. At the time of going to press indications seem favorable for weather cold enough to make ice.

**For Three Meals a Day**

You can cut from loaves of our bread for the three meals each day every day of the year and know that each slice will be devoured and enjoyed by every member of the family. Of course you can vary the kind of bread you serve because we make several kinds, including raisin bread. You know how the children love it. Use our bread exclusively.

**CLARESHOLM BAKERY****GOOD BUYS**

For quick cash sale I have a good four roomed house. Water, light and gas installed. Price \$1050.00.

Also a good general store business, which includes stock, residence, post office, telephone exchange, Imperial Oil business, and filling station. It will take \$7,000.00 cash to handle this.

**S. L. FRASER****Harness and Saddles,**

Trunks, Bags, Fancy Leather Goods,  
Gloves, Shirts, Socks, etc.

All kinds of Leather Repairs a specialty. Skates sharpened.

**J. T. KINGSLEY****OWNED BY FARMERS**

Farmers own U.G.G. Elevators.

Farmers have set the standard of service given by these elevators. The Farmer owners insist on the best possible service for themselves and every farmer, whether shareholder or not, is entitled to the same service and treatment. And every dollar of earnings of these elevators belongs to farmers.

Deliver your grain to:

## How Prairie Agriculture Has Led The Way In Strengthening The Economic Bonds Of Empire

The vigorous impetus which Western development has lent to Canadian progress during the present century is pretty generally realized, but it is doubtful whether there is full appreciation of the no less striking manner in which the prairie agriculture has led the way in strengthening the economic bonds of Empire.

1897  
All Products

1927  
Wheat & Flour only

\$69,500,000

\$276,500,000

CANADA'S EXPORTS TO THE UNITED KINGDOM

For twenty years prior to 1907, Canada's products of all kinds in the commerce with the Motherland were virtually stationary, barely holding its own. Its value in 1925, however, had it had been in 1875, two hundred million.

This enormous increase, the amazing rapid settlement of the Canadian prairie—the development of wheat-growing resources on a scale that was deemed not merely to remodel the land

### Drill Plow New Implement

Cultivates Soil and Plants Seeds in One Operation

A new implement is being introduced to Western Canadian agriculture. It is a combination plow and seeder which by the soil can be cultivated and seed planted in one operation, and it is known by the name of the "drill-plow". The inventor, Peter Isaac, a Russian by birth, has been recently interesting representative farmers and business men in the implement by means of practical demonstrations. The machine can plow and plant seed at any required depth. The hauling power has to be regulated according to the nature of the soil. Mr. Isaac was brought up on a farm in Russia and had thirteen years' practical experience with drill-plows in that country. A recent demonstration of his latest machine at the Manitoba Agricultural College in the presence of a number of agriculturists proved very satisfactory, the machine doing everything claimed for it.

The drill-plow, designed to be a time and labor-saving device as well as a seed sower, will come in as a surprise to many, doing as it will the two services of plowing and seeding at the same operation. With the aid of the drill-plow seed grain may be put into the ground in the spring with the best possible delay, the plant thus obtaining quicker growth thereby getting an even start with the weeds, as well as having the use of all available moisture.

### Silage For Winter Lambs

Determining the Relative Value of Sunflower and Oat Silage and Vetch Silage

At the Kamschatka, Ontario, Experimental Station, an experiment was conducted during the last four winters to determine the relative value of sunflower and oat, peat and vetch silage as a part of the ration for winter lambs. The results indicate an advantage for the sunflower silage. The average daily gain per lamb for four years, was \$2.18, for those fed oat silage, \$1.17, for those fed oat, peat and vetch. The feed cost per 100 pounds was \$10.17 for the former and \$15.62 for the latter.

### Did Not Waste His Time

Looking the Roman pontifical on parade after he had served five years for grand larceny, Alwell Austin took the time to patent rights in an invention which will be having work on a white convict. The device is an electrically operated railroad crossing gate. Another one was patented, the \$100 necessary to secure the patent.

W. N. H. 1711

### Silage Crops For Saskatchewan

Sunflowers Have Proved To Be the Most Dependable

The question of a suitable silage crop is attracting a good deal of attention among stockmen in Saskatchewan at the present time, states the superintendent of the Scott, Saskatchewan, Experimental Station in his latest annual report. He points out that, like chaffy, in soil drifting, weeds, and the risk in strawed grain growing, there is a gradual change taking place on the prairie toward a more diversified system of farming. This movement carries with it an increase in live stock necessitating all sorts of part of the silage feed particularly where dairy cattle are kept. Experience at the Scott Station has shown that under conditions in the district late spring and early fall crops considerable damage to corn. In cool seasons the yield of corn is always low. Oats have certain good points as a silage crop but in dry seasons, when silage is most needed, they lack the ability to produce a high average tonnage. Sunflowers, however, have proved to be the most dependable silage crop at the Scott Station. They produce a larger green weight tonnage than either oats or corn and are able to withstand 40 to 50 degrees of frost without serious damage. They produce a larger green weight tonnage than either oats or corn and are able to withstand 40 to 50 degrees of frost without serious damage. It is true that yields from crops following them are not so high as those following corn.

### Develops Colorful Corn

Field Of Illinois Scientists Looks Like Flower Garden

The corn country of the mid-west may be transformed into rolling parks of color by the time the harvest comes, the discovery of Harvey J. Searns, Illinois agricultural scientist and author. Searns has developed varieties of corn that colors that would do credit to any flower garden.

Purple, green, bronze, yellow, lavender, and pink corns and having a few of the shades that decorated his 2,500-acre farm near here, Graduate University of Illinois, Searns started his selection and breeding in 1902. He has developed cobless corn, puffed corn and "chrysanthemum" corn.

While none of the varieties are of value only as curiosities, others have genuine economic value.

### Cure For Seasickness

Gas masks now are provided for seafaring passengers on the North German Lloyd line. Stuttgart, and she came into harbor the other day with the report that 50 per cent. of the passengers were relieved of their seasickness by the ship's surgeons. It is nothing but a mask with the tang of salt earth in it.

First Steno: Did you observe Fire Prevention Week?

Second Steno: Yes, I got into the office earlier; the boss was getting some.

### CANADIAN CHAMPIONS

Where the Scotman Scored  
A Scotman was being shown around a battleship for the first time in his life, and being keenly interested in all he saw, he asked his guide with all sorts of questions. The Scotman seemed to interest him, and going up to one he pointed to the gun on the main deck and asked what it was.

The Scotman looked at him in surprise. "Don't you know me?" he asked. "Why, that's a terrible question." "Ach, now," replied the Scotman impatiently, "I was no' asking about yer head."

For the 12 months ended October 31, 1927, Canada exported 1,838,971 pounds of fresh cream and 5,515,175 pounds of fresh milk having a combined total value of \$3,821,602. Practically all of these dairy products went to the United States.

For every successful man you meet you will meet a dozen unsuccessful ones who claim to have given him a hand.

### Unprofitable For Feed

Hulls Should Be Sifted From Oat Chop For Young Pigs

If oat chop is to be fed to little pigs it is a worthwhile practice to sift out the hulls. The hulls are not only unpalatable to the young stock, but they are very difficult to digest. If time cannot be taken to remove hulls, it is doubtful if oat chop can be fed profitably to pigs under three or four months of age unless one is growing the hullless oats which thrives out ready for grinding into oatmeal which is good for all classes of stock. In an experiment conducted at the Lacombe, Experimental Station to test the advantage of removing the hulls from oat chop for little pigs, it was shown that during a feeding period of 127 days the gains made by the lot fed the oat chop with the hulls removed, was a little less than \$1 a hundred pounds, whereas it cost \$5.78 per hundred pounds of oat chop with the hulls removed. Furthermore, the lot getting the unsifted chop had to be carried on for about six weeks on a diet of barley chop to bring them up to a finishing weight. Bulletin No. 72 of the Department of Agriculture at Lacombe, Manitoba, states that "Central Alberta," expresses the view that the labor involved in sifting the oats by hand prohibits following the practice when large numbers of hogs are fed. Hullless oats, the authors of the bulletin claim, is the logical feed in the weaning ration of piglets and there are not available. The conclusion is reached that oat hulls as contained in oat chop are rejected by sows and their pigs and wanting period and for the entire feed of piglets of the market but when the oat ration is continued throughout the entire feeding period.

### A Profitable Sunstroke

Made Him Double Egg Production Says Lincolnshire Man

Does sunstroke make a chicken lay more eggs?

The answer seems to be in the affirmative, judging from the eggs laid by a hen owned by H. F. Parker, of Lincolnshire, England. This hen was affected by sunstroke last year and ever since has been laying two eggs at a time more times a week. On two occasions she has actually laid three eggs.

A short time ago the other hen in the yard became lame of her right leg and was being attended by her. She was then separated from the others and immediately began showing her contentment for such treatment by laying eleven and twelve full-size eggs a week.

### Million Acres Of Fall Wheat

More than 1,000,000 acres were sown to fall wheat in Canada up to October 31 of this year, according to the latest report of the Dominion Department of Agriculture. Ninety-two per cent. were sown in Ontario, and about 54,000 acres in Alberta.

Forty-eight years ago Edison's first electric lamp shone out and probably some went out. But he had the idea.

## The Beneficial Effect Of Tree Planting In The West Is Now Being Recognized

The planting of trees on prairie farms in Western Canada is having an appreciably beneficial effect on the quality and variety of agricultural production in that part of the Dominion. The large acreage growing annual distribution of planting material made from nursery stock of the Department of the Interior at Indian Head and Lacombe, Saskatchewan, is gradually changing the general appearance of the prairies in the provinces of Manitoba, Saskatchewan, and Alberta, and the development of shelterbelts is being followed by the setting out of small fruit orchards, gardens of fine vegetables and by the further beautification of prairie homes with shrubs, flower beds, and extensive lawns.

A recent report from the Tree Planting Division, Forest Service, Department of the Interior, indicates the growing success of tree planting in the new avenues of development opened up as a result of this work. Further and further a-bid work of the movement of the work is being carried and requests for stock are now received from practically every part of the prairie. At present the demand for trees is greater than it has been at any time in the twenty-seven years since the inauguration of free tree distribution and in 1927 these shipments were the largest so far with a total of 1,490,000 seedlings and cuttings. These were sent out to over 31,000 farmers under the Department's cooperative plan. Trees have been provided in 1928 as inspections have been made of these new plantations, and trees to seed the next year.

To ensure success in the establishment of shelterbelts and to help the farmers to succeed by the Forest Service, from early June until freeze-up a corps of fully experienced field men travel continuously inspecting proposed new plantations, advising farmers who are actually planting, and taking careful census of the plantations of the previous year. The policy is to take note of the effect of the plantations on the soil and economic life of the settler. The programme has been the encouragement given to the growth of fruits and to the building up of really attractive home surroundings by the planting of ornamental shrubs and flowers and the setting out of lawns.

Twenty years ago the number of prairie farms with really first-class vegetable gardens was small while only rarely was the growing of fruits of fruit and the back in the garden. In 1927, covering 2,812 farms visited show that of this number 2,411 had good vegetable gardens, 1,275 provided small fruits; 279 had ornamental shrubs; 242 were testing standard apples and pear saplings; while 1,000 were growing plum trees.

Although the development of tree planting in the Prairie Provinces has been rapid in recent years, its rapid progress during the few years immediately following its inauguration in 1901 was comparatively slow. Settlers and farmers were very skeptical as to the possibility of growing trees successfully on the prairies and although the area were to be had free only 17 farmers could be induced to set out plantations, and the total number of trees distributed in that year was but 24,800. The success of these early plantations encouraged other farmers to take advantage of the opportunity to beautify and improve their homes, and ever since there has been a gradual increase in the demand for tree-planting stock.

Up to date the number of trees shipped from the Indian Head and Saskatchewan seedling and cuttings of maple, ash, caragana, poplar, and willow; all of these were furnished free of charge to those applicants who had proved in a satisfactory manner of preparation. Of evergreens, 1,651,115 have been distributed. These were white spruce, Scotch pine, jack pine, and balsam poplar only limited numbers of evergreens are grown and at that account a nominal charge of \$2 per tree is made. Although the primary function of the nursery stations is to supply trees for farm shelterbelts and woodlots, nearly 1,000,000 evergreen seedlings and transplantations were supplied for planting on various national forests under the Dominion Forest Service.

## ANSWERS TO LAST WEEK'S QUESTIONS

337. Is World's Food Production Keeping Pace With Population Increase?

Despite the fear expressed in many quarters that there would soon not be enough food produced to feed the earth's inhabitants, food production is keeping well ahead of population increase. World's production of primary foods in 1923 was 13 per cent greater than in 1913; during this interval population increased from 1 billion 625 million to 1 billion 750 million, or 7.2-3 per cent, indicating that increase in food supplies has been nearly double that of population increase—wheat, corn, potatoes, oats and rice (exclusive of Russia) increased from 17 billion bu. in 1913 to 20 billion bu. in 1923.

## 338. Total World Production of Basic Foods?

Wheat production increased from 3.16 billion bu. in 1913 to 3.70 billion in 1923; corn from 3.54 billion bu. to 4.2 billion bu. in 1913 to 4.14 billion in 1923; potatoes decreased from 17 billion tons in 1913 to 16 billion tons in 1923.

Rye advanced from 881 million bu. to 1.43 billion bu.; rice in 1913 was about 350 million tons, and as a result of the War is not far from that figure today.

## 340. What Causes Rain?

Water evaporates from all moist surfaces of the earth (mostly the sea) and enters the atmosphere as a transparent, invisible gas called "vapor." A cubic foot of air at 32 degrees Fahrenheit can hold 2 grains of vapor, at 90 degrees 15 grains. When air contains all the moisture it will hold is cooled by rising to higher altitudes or entering colder latitudes, it no longer can hold all its vapor and a portion of it condenses and falls in raindrops—sometimes as tiny as a hundredth of an inch in diameter, at other times big splashing ones a third of an inch. The big fella's fall at a rate of 25 feet a second, the tiny ones 5 feet.

Volume of world's seashore trade in 1913 was about 350 million tons, and as a result of the War is not far from that figure today.

## 342. The Great Good Done by "Wind-Blown Dust"?

The shell of wind-blown dust as distinguished from floating dirt, is rarely thicker than half a mile. Every year billions of tons of earth, in the form of dust particles, are lifted and held in the air currents and transported by the winds to great distances. Over the plains of the U. S. vast quantities of rock waste born of the western mountains and dust from the arid regions of the Southwest are distributed and leveled. The process is usually beneficial. Millions of tons of mineral matter are thus taken from unproductive regions and converted into soil which has the potentiality of nutrition and life.

343. The Great Harm Done by "Wind-Blown Dust"?

In arid regions where vegetation cannot anchor it, wind-blown dust is a mighty physiographic agent. Parts of China are covered with hundreds of feet of fine earth, brought little by little from the deserts of Central Asia. Dust carried 1,000 miles from the Desert of Gobi fills the channels of the Hwang, China's "River of Sorrows," until its bed and banks are higher than the surrounding lands. Twice yearly excessive currents and transported by the winds to great distances. Over the plains of the U. S. vast quantities of rock waste born of the western mountains and dust from the arid regions of the Southwest are distributed and leveled. The process is usually beneficial. Millions of tons of mineral matter are thus taken from unproductive regions and converted into soil which has the potentiality of nutrition and life.

# The NEW CAR

## INTRODUCING A FINE CAR IN THE LIGHT CAR FIELD

THIS entirely new car surpasses the accepted standards of light car accomplishment; sweeps aside all boundaries of price class; establishes a new standard of acceleration, speed, power and smoothness. Heretofore the following characteristics have been combined only in expensive cars.

## Speed—better than a mile a minute.

Acceleration—5 to 25 miles per hour in high gear in 8½ seconds.

Endurance—this car will travel all day at 50 miles per hour without strain on motor or chassis.

Riding comfort—flexible springs and four hydraulic shock absorbers permit comfortable travel at high speed over the roughest road.

Roadability—this car's low center of gravity holds it snugly to the road on an unbanked turn even at high speed.

Power—in deep, loose sand and with the front wheels cramped and from a dead stop, the car will turn in a tight circle, forward or reverse, without effort.

Effective braking—the instant response of mechanical, four-wheel brakes with dual control ensures positive braking for any emergency.

Positive steering control—A relaxed hand on the steering wheel will hold the car steady in loose sand and over bumpy roads. Turning radius 17 ft.

Economy—50 miles per gallon of gasoline, plus the well known economies of Ford car maintenance.

Appearance—coach work of pleasing proportions, tastefully finished in an extensive range of color combinations of durable satin lacquer.

Quietness—Vibration in the engine is practically negligible. New final drive is exceptionally quiet. Double-ply anti-squeak tape, asphaltum treated fabric and hardwood blocks between body and frame minimize body noises.

**Motor**  
Make and Model—Ford "A"  
Four Cylinders—Bore 3½"; Stroke 4½"  
Unit Construction  
Pump and Thermo-Siphon Cooling  
Pump, Splash and Gravity Lubrication  
Single Coil Distributor Ignition  
Sliding Gear (3 speed) Transmission  
Multiple 9 Plate Dry Disc Clutch  
Crankshaft—Statically and Dynamically Balanced  
High and Low Speed Jet Carburetor (hot-spot manifold)  
Aluminum Pistons  
Oil Indicator  
Two Blade Aeroplanes Type Fan  
Bakelite Fabric Timing Gear  
Chromium Nickel Alloy Valves  
N. A. C. Rating 24.03 H. P.—Actual  
Developed H. P. 40 at 2200 R. P. M.

Coupe

Phaeton

Roadster

Engine—At 2200 revolutions per minute the new four cylinder engine develops 40 H. P. This revolution speed is low for such power and sets an entirely new standard for light car speed and acceleration, enduring quality and operating economy.

Engine lubrication—Combination of pump, splash and gravity feed thoroughly lubricates all frictional surfaces regardless of road grades.

Cooling system—Combination water pump and Ford thermo-siphon system doubly insures ample cooling. Engine warms up quickly but will not overheat.

Electrical system—The new Ford designed distributor is placed on top of engine permitting direct connection to spark plugs by means of short bronze bands. The single coil is protected by a waterproof case. Co-incidental lock on ignition circuit is their proof. The powerful starting motor and dependable generator are both of Ford design.

Clutch and transmission—Patterned after the famous Lincoln, these units give an operating ease never before found in moderate priced cars. The nine plate multiple dry disc clutch and the selective transmission are designed to make shifting of gears remarkably easy and simple. Getaway, unexcelled by any car made today, is just one of the many advantages. Three speeds forward and one reverse. All gears are made of heat-treated chrome alloy steel. The only light car in which transmission shafts are mounted on ball and roller bearings.

Rear Axle—The axle shaft itself carries no weight as the ¾" floating principle places the weight of the car on the axle housing. Flexible roller bearings minimize rear wheel friction. A Torque Tube drive and spiral bevel gear are additional features.

Springs—Transverse semi-elliptic design. Relieved of all driving strain, they perform the sole function of cushioning road shocks. The transverse type of spring helps to prevent a large amount of frame distortion, makes four-wheel brake operation more efficient, gives easier steering and reduces unsprung weight.

Chassis lubrication—Alemite-Zerk pressure system.

**Equipment**  
Steering  
Foot Accelerator  
One Piece Windshield Sun Visor  
Thief Proof Ignition  
4 Hydraulic Shock Absorbers  
Wide Range of Color Options

**Chassis**  
4 Wheel Brakes—Mechanical Internal Expanding Type with Automatic Equalizer  
Springs—Transverse Semi-Elliptic Drive—Torque Tube, Quasi-Spiral Bevel  
Rear Axle—Three Quarter Floating  
Full Crown One Piece Fenders  
Gravity Feed Fuel Tank  
Ignition Wires Enclosed in Flexible Steel Tubing  
Steering Gear (Irreversible)—Worm and Sector Type  
Accord Design, Nickel Plated Heddlights  
1 One Piece Spoke Spoked Wheels  
17½" Steering Wheel  
Alemite-Zerk Pressure Lubrication  
Body and Chassis Insulated to Prevent Noise  
Wheel Base 103½ Inches  
Turning Radius—17 Feet  
Tire Size—30 x 4.5  
Road Clearance—9½ Inches

WORLD HAPPENINGS  
BRIEFLY TOLD

The Danf winter carnival is to be held the week of February 10 to 13 this winter.

Sweden's first woman judge, Miss Mary Traugott, has made her debut in the county assizes at Skarviken, near Stockholm.

The annual dog racing classic of Eastern Canada, the Eastern International Dog Sted Derby, will be run again at Quebec City, February 22-23.

The first Anglo-American hockey game since the war was played at Polkston, England, December 8, and resulted in a draw with a score of 2-2. A caution is issued at Ottawa by the Canadian Tuberculosis Association against accepting too readily "cures for tuberculosis," announcements which have been recently published.

Engineers of the Canadian Marconi Company are conferring with officials of the Radio Corporation of America on plans to start a short wave system between New York and Montreal.

On a clipper from an American refrigerator steamer, Alexander H. McKay of North Vancouver made his will, two days before he died. His will was probated in supreme court there.

Feeling that their rights of property were adequately represented, residents in the North West Territories are petitioning the Dominion parliament for a seat to be provided for that section of the country.

Announcement is made from London, England, that the Empire Staffing Board will give a special reception and dinner to the party of Canadian farmers which is to go overseas during the coming winter.

After 22 years of continuous service, Frances E. Harrison, Vancouver postmaster, has been superannuated, effective June 1, 1927. Mr. Harrison will leave on six months' vacation with full pay.

## Canada Retires Loan

Financing by Federal Government Shows a Healthy State Of Affairs

An indication of the healthy state of Canada's financial condition is given in a recent announcement by Hon. James A. Robb, Canadian Minister of Finance, to the effect that of \$100,000,000 loans maturing between Nov. 1, and December 1, \$55,000,000 will be paid out of revenue and the balance of \$45,000,000 will be taken care of by an issue of four per cent. Treasury notes which have been sold to the chartered banks of Canada at par. By this arrangement interest charges of \$2,607,500 annually will be saved.

The sale of these treasury notes marks the first financial since 1913, when the Dominion Government had effected at a not cost as low as four per cent. The treasury notes will be dated December 1, 1927.

## Per Capita Power Installation

As the industrial production of a country is largely dependent upon the amount of mechanical power available to its workers, Canada's high average of 51.6 horse-power per head of population per 1,000 of population places her in a most advantageous position among the countries of the world.

A safe and sure medicine for a child troubled with worms is Mother's Own Worm Expeller.

## Value Of Dog Teams In Far North

What the ram is to the desert and the motor car is to the civilized world, the "huskie" is to the traveler over the snows of Northern Canada. The efficiency of the dog team as a means of travel is demonstrated in the fact that a trained team can make a distance of 40 miles a day, and maintain this speed for days together.

## Our Fashion Book

This charmingly youthful frock is a new and desirable style for the girl or small woman. The "Popple" skirt is attached to a ruffled bodice, and lace or contrasting material is effectively used for the front waist and lower part of the skirt. Size 12-14. Price 29 cents. Size 14-16. ## Sunshine Club

The Sunshine Club will meet at the home of Mrs. Oscar Anderson on Wednesday, January 11th. This is the first meeting in the new year. Special program furnished by the hostess for the social hour. Come one, come all and encourage our new officers Mrs. Oliver Mosley, president; Mrs. W. J. Chilton, vice president; Mrs. Boniface, secretary-treasurer; directors, Mrs. Holmes, Mrs. Mack, Chilton, Mrs. Jack Dickenson.

## Starline Women's Institute

The first regular meeting of the Starline W. I. will be held at the home of Mrs. W. J. Davies, on Thursday, January 12th. This meeting will be of great interest to all members as the 1928 program will be read and all will be anxious to learn their part of the year's work.

A meeting of the Starline W. I. executive was held Thursday afternoon, at the home of Mrs. Claire Strang. Mrs. Claude Strang, president; Mrs. T. E. Chilton, first vice president; Mrs. George Lepard, second vice president; Mrs. Oliver Mosley, secretary-treasurer; directors, Mrs. Curtis, Mrs. Davies, Mrs. Schram, Mrs. Gutterger.

## New Year's Celebration

Many young and elderly men and women friends, assembled at the home of Mr. and Mrs. J. A. Harrison on Monday evening to celebrate the New Year.

Supper was served at 6 o'clock by the waitresses dressed in red and white, matching the beautifully decorated table. Red and green streamers hung from the center of the ceiling to the edges of the table. The red decorations on the table made a beautiful appearance against the white table cloth. Red candles glowed at each end of the table during supper. And the cake decorated in red and white, was eaten to the health and prosperity of Mrs. Harrison.

Eleven guests were seated at the first table and seven at the second. One charming young gentleman made it his business to arrive just as supper was at an end, to have the honor of eating with the waitresses. This cause

equidate a little excitement. Bombs were pulled before supper began, and each guest wore the hat that was chosen during supper. Each man chose his partner by means of drawing numbers. Games, etc., were enjoyed by all from eight o'clock and on. The guests departed expressing the wonderful time the had.

## Starline U. F. W. A.

The annual meeting of the Starline U. F. W. A. was held Wednesday, December 28, 1927. Election of officers resulted as follows:

President - Mrs. S. C. Sorenson re-elected.  
First Vice President - Mrs. M. Schram.  
Secretary - Miss Hattie Nordin.  
Directors - Mrs. Thor Brown, Mrs. S. McNally, Mrs. R. Thomas, Mrs. C. Curtis, Mrs. H. Schram.

Program Committee - Mrs. S. C. Sorenson, Miss Hattie Nordin, Mrs. E. W. Brown, Mrs. M. Schram.  
Lunch Committee - Miss Doris Lepard.  
Auditors - Mrs. J. C. Strang, Mrs. C. Curtis.

## MIRIAM GREEN ELLIS JOINS THE FAMILY HERALD STAFF

Announcement has just been made that Miriam Green Ellis, Dominion wide authority on Agriculture, has joined the staff of the Family Herald and Weekly Star with headquarters at Winnipeg. As a brilliant writer and a student of conditions as they affect the western farmer, Mrs. Ellis is too well known to require introduction here. Articles from her pen have appeared in all of the great journals in the world of agriculture and readers of the Family Herald and Weekly Star are to be congratulated on having her services for their enjoyment and instruction. This appointment is in line with the policy laid down for the coming year by the publishers of the Family Herald of a paper more entertaining and broader in scope than ever before.

## Card of Thanks

Mrs. J. R. Chilton and family wish to thank their friends for kindness and sympathy extended during their recent bereavement also for the beautiful floral tributes.

Pincher Creek, Jan. 5.—The league leading Granum team in second. One charming young gentleman made it his business to arrive just as supper was at an end, to have the honor of eating with the waitresses. This cause

## DO YOU KNOW?

(Continued from fourth page)  
rains cause an overflowing of the river and the cutting of new channels, frequently accompanied by much destruction. The miles of sand hills (dunes) along the seashore and the Great Lakes are created by wind.

## CHURCHES

## ST. JOHN'S THE EVANGELIST CHURCH OF ENGLAND

Services will be held on Sunday as follows:

11 a.m.—Morning service.  
12 o'clock—Sunday School and Bible class; also confirmation.

7:30 p.m.—Evening service.  
The preacher at both services will be Rev. W. Barlow, 1 Th.

At the morning service I will give a New Year's message to the people of Clareholm.

At the evening service I will speak on the Revival. Prayer Book of the Church of England and try to show you why it was rejected by the House of Commons after it had passed the House of Lords. The rejection of the Book was the salvation of the Protestant Evangelical cause of the Church of England. It concerns every true Protestant, so come and see what it means to you, your children, and nation, to have it rejected.

## THE CHURCH OF THE NAZARENE

(Next door west of the Clareholm Garage.)

10:30—Sabbath School.

11:30—Preaching.

7:30—Preaching.

Rev. Thomas Bell, evangelist will preach both morning and evening, also every week night at 8 o'clock, Saturday excepted.

Rev. A. H. Eggleston.

On next Sunday, January 8th the Church of the Nazarene plans (D.V.) to have a series of revival services with Rev. Thomas Bell as the evangelist.

Rev. Bell has for many years been a resident of Alberta. In the earlier years of his ministry he was associated with the Methodist church, though within a recent years he has held his membership with the Church of the Nazarene. He is a seasoned minister of experience. The pastors and members of the local church here feel that we can with confidence recommend Rev. Bell to the people of Clareholm and vicinity, both church and non-church attendants.

To one and all we extend a hearty invitation to avail yourselves of the opportunity to hear Rev. Bell and enjoy the services. When you come, once, you will want to come again.

Good music, Bible preaching spiritual services.

## THE WALL OF CHINA

In 214 B.C., the Chinese commenced building the Great Wall, which isolated their country from the rest of the world and helped retard their national progress.

The business man who maintains a wall of "dig-nified reserve" towards the buying public is just as surely retarding his own business growth.

Your advertisement in The Review - Advertiser would be a standing invitation to your store. When our readers open up their paper do they see your "bid"?

## Another PRICE Suggestion

## Maple Nut Cake and Chocolate Layer

THIS unusual, economical Maple Nut Cake will keep fresh for several days, and the Chocolate Layer Cake, made in a little different way with Dr. Price's Cream Baking Powder, is a family favorite too. Try one or both of them today!

(All measurements for all materials are level.)

## MAPLE NUT CAKE

1 cup shortening  
1 cup light brown sugar  
2 eggs  
1 cup milk  
1 cup flour  
1 teaspoon salt  
2 teaspoons Dr. Price's Baking Powder  
1 cup chopped nuts—preferably ground  
1 teaspoon vanilla extract

Cream shortening, add sugar slowly and yolk of egg and milk and beat well, add flour, salt and baking powder together and add chopped nuts, fold in beaten whites of eggs, add flavoring. Bake in well greased loaf pan in moderate oven 35 to 45 minutes. Cover top with maple icing and sprinkle with chopped nuts while still soft.

## MAPLE ICING

1/2 cup maple butter  
1/2 cup maple syrup

Made from Cream of Tartar, derived from grapes. Raises the dough perfectly, giving the food fine texture and rich flavor.

MADE IN CANADA

DR. PRICE'S CREAM Baking Powder

1 1/2 cups confectioner's sugar

1/2 teaspoon Dr. Price's Baking Powder

1/2 teaspoon maple flavoring

Add butter to hot milk; add sugar slowly to make paste of the right consistency to spread; add flavoring, and baking powder and spread on top and sides of cake.

CHOCOLATE LAYER CAKE

1/2 cup shortening

1 cup sugar

1 egg

1 cup milk

1/2 cup flour

1/2 teaspoon salt

1/2 teaspoon vanilla extract

Cream shortening; add sugar gradually, beating well; add beaten egg, one-half the milk and mix well; add one-half the flour which has been sifted with salt and baking powder; add remainder of milk, then remainder of flour and flavoring. Beat after each addition. Bake in greased layer cake tin in moderate oven 15 to 20 minutes. Put together with

CHOCOLATE FILLING AND ICING

1/2 cup confectioner's sugar

1/2 cup boiling water

1/2 teaspoon vanilla extract

1/2 cup unsifted chocolate

1/2 cup milk

1/2 cup ground orange peel

To sugar add boiling water very slowly to make a smooth paste; add vanilla, melted chocolate and orange peel. Spread between layers and on top of cake.
